DIGITALFABRIC® - PRACTITIONER EXPERIENCE. ANALYST INTELLIGENCE. ORIGINAL IP

DIGITAL FABRIC®
THE TI FRAMEWORK

We not only observe markets from the outside, We understand how the market is built from the inside.

OUR THREE CORE
DIMENSIONS

1. **AI FOR BUSINESS AND OPERATING MODEL**
2. **TECHNOLOGY & PLATFORM STRATEGY AND COMPETITIVE POSITIONING.**
3. **PRACTICE RESEARCH, ADVISORY, AND BENCHMARKING FOR SERVICE PROVIDERS AND ENTERPRISES.**

OUR FIVE
STRENGTHS

1. **PRACTITIONER DNA**
2. **GLOBAL SME NETWORK**
3. **ORIGINAL IP**
4. **EXECUTION-INFORMED ADVISORY**
5. **ANALYST EDGE**

- **Practitioner-led consulting and practice research firm** with advisory and competitive provider positioning through GTM and technology/AI adoption guidance experience across 15+ technology domains, including hyperscalers, enterprise platforms, intelligent automation, AI, and digital engineering. Our team comes with a collective AI, IT & Digital Consulting & Practice Leader Experience of ~200+ years, in Gartner, Accenture, Wipro, Genpact e.t.c.
- **Globally relevant connected partnership ecosystem**, with engagement across T-Hub, Frost & Sullivan, SSON, NASSCOM, HYSEA, startups, enterprises, technology providers, and innovation ecosystems.
- **PROSIGHT™, our specialized AI practice,** focuses on AI Service Management and AI practice consulting, supported by proprietary IP including AISWITCH™, AISTATE™, GREAI™, AIFIELD™.
- **DIGITALFABRIC® CONSULTING holds exclusive rights to implement AISWITCH™,** helping enterprises and service providers establish AISM Practice, and assess, benchmark, govern, scale, and improve AI practice maturity, adoption, ROI, and business impact.
- **Together, DIGITALFABRIC® CONSULTING + PROSIGHT™** operate at the intersection of research, strategy, governance, and execution, combining benchmark data, proprietary frameworks, and practitioner experience to translate strategic intent into measurable transformation outcomes.

BUSINESS ENABLEMENT

We help enterprises and technology providers move from capability to differentiation, intelligence to action, and AI investment to measurable enterprise value.

DIGITAL FABRIC®
THE TI FRAMEWORK

BUSINESS FRICTIONS (CAUSE & EFFECT)

1 | DIFFERENTIATION DEFECIT
Strong capabilities but weak, generic or indistinguishable market positioning.

02 | VISIBILITY TO CREDIBILITY GAP
Deep expertise and delivery credentials that are not translated into credible market narratives and leadership visibility.

03 | STRATEGY–EXECUTION DISCONNECT
Technology ambition and investment without sufficient practice architecture, governance, adoption or measurable outcomes.

04 | MARKET BLIND SPOTS
Internal teams lack an independent practitioner-informed view of competitors, buyers, platforms and emerging market whitespace.

05 | AI PRACTICE MATURITY GAP
AI investments scale faster than enterprise practices for governance, service management, economics, workforce, trust and value realization.

PERSONA CENTRIC VALUE CREATION

CLIENT SEGMENT	PRIMARY LEADERSHIP PERSONAS	TYPICAL NEED
GSIs / Technology Services Providers	Practice Heads, BU Leaders, Strategy, Sales, Marketing	Differentiation, portfolio strategy, analyst positioning, competitive intelligence
Technology & Platform Providers	Product, GTM, Strategy, Ecosystem Leaders	Product positioning, market intelligence, ecosystem strategy, roadmap validation
Enterprise Clients	CIO, CTO, COO, CAIO, Transformation Leaders	AI readiness, governance, operating model, AISM, technology strategy
GCCs	GCC Heads, Transformation & Capability Leaders	Capability strategy, AI adoption, operating-model modernization
Innovation / Startup Ecosystems	Founders, Incubators, Investors	Market entry, GTM, positioning, research, growth strategy

A NEW FORWARD DEPLOYMENT CONSULTING MODEL FOR ENTERPRISE AI

DIGITAL FABRIC®
THE TI FRAMEWORK

WE ARE ONE OF THE FIRST FDCs (FORWARD DEPLOYMENT CONSULTANTS) in AI Engineering and AISM Practices.

RETAINER-BASED | EMBEDDED | ALWAYS-ON

EMBEDDED CONSULTING

Building differentiated value propositions and market positions

We help discover, define, and sharpen unique strengths, the “secret sauce” that can be converted into a strong differentiator

- ESM & AI Practice consulting
- FDC Mode Strategy Consulting
- Tech/AI Portfolio Rationalization & Evaluation
- Tech & Service Blueprinting

MARKET NARRATIVE & INFLUENCE

Creating market visibility around those strengths

Once the differentiated positions & unique strengths are identified, we help package & position your service/solution/product

- Position papers
- Strategy narratives
- Market predictions
- White-labeled practice leadership notes

STRATEGIC MARKET INTELLIGENCE

Acting as an external market filter and strategic SME layer

We track what most service providers, platforms, and enterprise buyers are doing, Hence build messages around what others are not yet saying.

- This includes pragmatic & unbiased SME support
- Review of strategic storyboards
- Refinement of RFP/RFI responses
- Sharper client-facing narratives.

RESIDENT ANALYST As A FDC

Strategy & Engineering

- Platform Roadmap
- AI practice IP
- Engineering alignment.

Resident AI Strategy Office™ Extension — Strategy, Engineering and Market Intelligence Embedded as One Continuous FDC Capability

A resident, practitioner-led AI strategy office extension embedded across the CSO, CTO, Engineering and GTM functions to continuously connect enterprise AI strategy, platform direction, engineering priorities, market intelligence and commercialization.

Market Positioning & GTM

- Thought leadership
- Analyst influence
- Continuous GTM

WHAT CHANGES AFTER DIGITALFABRIC ENGAGES?

DIGITAL FABRIC®
THE TI FRAMEWORK

Consulting partnership value proposition

We become your Forward Deployment Consultants (FDCs), working with your product/ platform/ partner teams, continuously walking the Talk.

PLATFORM/PRODUCT/ SOLUTION COHORT

- Proven differentiation
- Stronger portfolio credibility
- Increased leadership visibility
- More compelling competitive positioning

ENTERPRISE AI

- Established AI CoE and 360 AI Practice
- Improved AI practice maturity – Value realization
- Stronger governance and trust
- Better adoption and scaling
- Clearer linkage between AI investment and ROI

PRACTICE

- Clearer portfolio architecture
- Stronger consulting propositions
- More relevant capability roadmaps
- Better alignment between strategy, delivery and GTM

Our impact is Market Creating, New Revenue models, Operating Models, Pricing and IP/ Skills Monetization, new growth opportunities creation, Improve both strategy and Execution through FDC

THE TI FRAMEWORK

Ashwin Gaidhani

Global Consulting Partner & SME (US & APAC)
Enterprise Services & Platforms

Ashwin Gaidhani is the Founder & CEO of DIGITALFABRIC® CONSULTING, an IP-led, practitioner-first consulting and research firm focused on enterprise services, digital transformation, platforms, and Enterprise AI. With over 25 years of experience, Ashwin partners with large enterprises, technology providers, GSIs, advisory firms, and innovation ecosystems to refine strategy, build differentiated service portfolios, shape market thought leadership, and translate emerging technology capabilities into differentiated market positioning.

He brings a distinctive blend of practitioner experience, consulting acumen, and analyst edge. His core expertise spans Enterprise AI, AI Service Management, intelligent automation, enterprise platforms (ServiceNow – Workday), managed services transformation, competitive intelligence, and executive narrative development. Ashwin has worked with global organizations, including GE Aviation, GE Infrastructure, Genpact, and Wipro HOLMES, as well as knowledge bodies such as AXELOS, ISACA, and SSON. He has also served as an independent consultant with Frost & Sullivan, leading technology research and advisory ecosystems.

At INTELLIBOT, he led digital strategy, analyst relations, positioning, and content strategy, supporting its recognition as a Strong Performer in The Forrester Wave™ RPA report, Q4 2019, and contributing to its acquisition by ServiceNow in 2021.

Ashwin holds ITIL Expert V3, Certified Process Architect, SIAM, and Cloud Computing certifications, along with a postgraduate business management qualification from XLRI Jamshedpur.

DIGITAL FABRIC®
THE TI FRAMEWORK

"Stagility": Practice can make AI perfect/best-fit for each organization's unique intelligence estate. Currently, fits are being ignored as models are outrunning the market, and the market is busy playing catch-up in a token/dollar-burning race.

Only by SMART AI & agentic automation practices, done Right First Time with the First Principles, post-generative AI can generate RoI. Towards this end, had built 200+ Gartner research IP's on cloud and AI Infra, ~100 of which are Foundational, plus MQs and ITScore. Received several Gartner Business Awards, having been consistently rated in Top 20 Analysts globally by clients.

2017 onwards, at Wipro, set up AI practices and partner ecosystem, filed 3 patents on XAI in a year, earning a Fellowship in the DMTS (Distinguished Member of Technical Staff). 2019 onwards, led AI-IA practices globally for HFS as Vice President. Then, from 2021, led AISWITCH (US TM) as the AI research partner firm for ISG, Frost and Sullivan. Leading 20+ ISG IPL Quadrants Research for US, on GCP, AWS, Microsoft, ServiceNow, NVIDIA and Digital engineering service providers. Leading multi-year AI practice and RoI maturity journeys for global ITSPs and end-user clients.

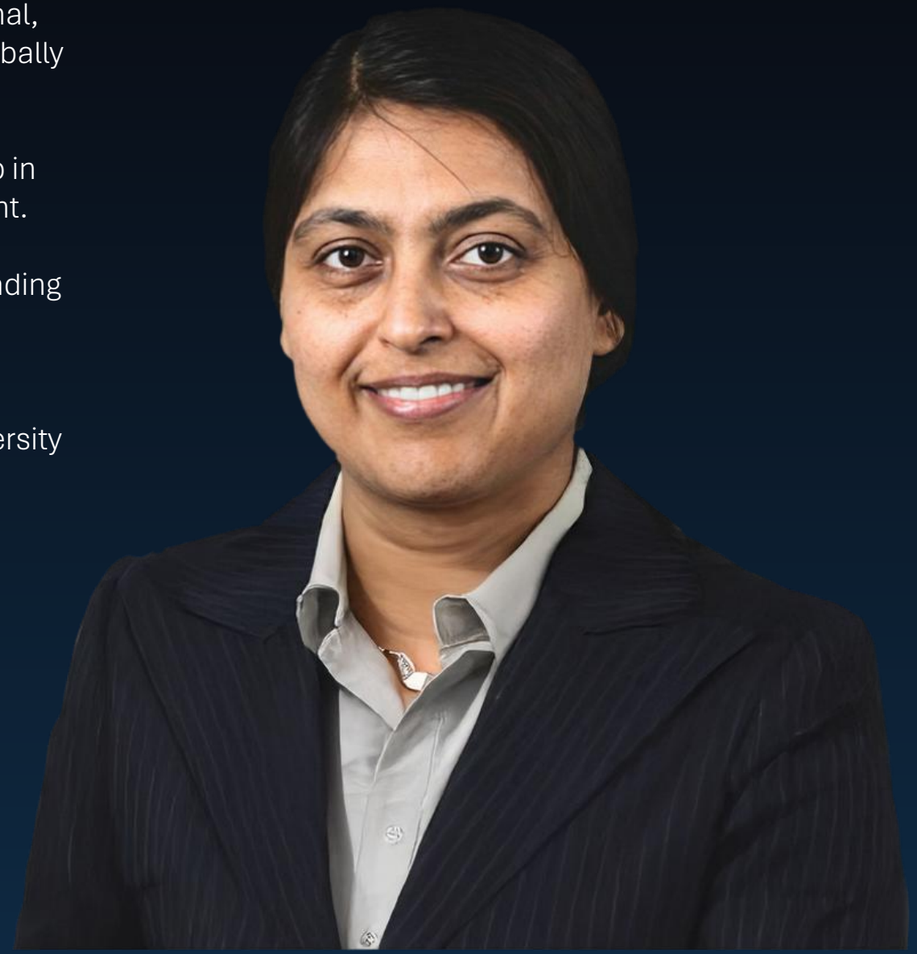

PhD in language AI, had built industry-first AI expert systems at GEC Marine Glasgow in 1997. Started as a Graduate Engineer in Technical Services at Tata Motors in 1995. University Gold Medalist in Engineering, DFID Scholar at the University of Strathclyde, Glasgow, UK.

Gaurang Pagdi

Global consulting partner & SME (GLOBAL)
GCC & BPO Services

Gaurang Pagdi is an industry analyst and former operations and transformation leader with more than 24 years of experience across Finance & Accounting, GCCs and enterprise operations. As an Analyst, he leads global research covering Finance and Accounting Outsourcing, Global Capability Centers, Human Resources Outsourcing and HCM platform services ecosystem. His work includes evaluating service-provider capabilities, analysing market developments and advising enterprise and provider leaders on operating models, technology adoption and competitive positioning.

Before moving into industry research and consulting, Gaurang served as the Head of Finance Operations for Amazon's $20 billion Advertising business across the US, UK, Middle East, and India. He also managed finance operations supporting more than 15 other Amazon India businesses. In this role, he led large, globally distributed teams and drove improvements in operational scalability, financial controls, customer experience, process standardization and automation within complex, high-growth business environments.

At HighRadius, Gaurang worked as a digital transformation consultant, helping global enterprises modernize their Order-to-Cash functions. His role involved assessing existing processes and operating models, identifying transformation opportunities, shaping technology-enabled solutions and developing roadmaps across process redesign, automation, analytics and organizational change. He worked at the intersection of business requirements and technology, helping finance leaders translate transformation objectives into practical and scalable operating improvements.

His expertise spans finance transformation, finance operations, digital operating models, automation, analytics, AI technologies, and GCC strategy and optimization. Combining hands-on operating leadership with an independent market perspective, Gaurang helps organizations translate emerging technologies and operating-model innovation into measurable enterprise value.

Mark Purdy

Global consulting partner & SME (EU)
Economics of AI & Agentic AI

Mark Purdy Mark Purdy is a thought leader and advisor on issues at the intersection of economics, technology and business. He has more than thirty years' experience as an economist in business and government, including twenty years as chief economist at one of the world's largest technology consultancy companies. He is a co-founder and director of Beacon Thought Leadership, a consultancy focused on economics and technology research and writing. He is based in London.

Mark has a particular focus on the economic and business impacts of next-generation digital technologies, especially artificial intelligence. He has provided expert input into projects covering topics such as the economics of supercomputing, the EU AI Act, the impact of the Online Safety Act on privacy and free expression, the economics of online safety regulation, and the economic and social impact of bias in AI systems. Separately, he has authored more than a dozen technology landscape reports assessing technology providers in areas such as intelligent automation platforms and services, cloud native technologies, and the Microsoft and Google cloud ecosystems.

Mark has also published widely on technology issues in tier-1 media and business journals such as Harvard Business Review, Sloan Management Review, The South China Morning Post and The Straits Times, with recent articles covering the workforce implications of agentic AI, AI-enabled decision making, the rise of the prompt economy, and the geo-strategic implications of AI.

A NEW FORWARD DEPLOYMENT CONSULTING MODEL FOR ENTERPRISE AI

WE ARE ONE OF THE FIRST FDCs (FORWARD DEPLOYMENT CONSULTANTS) in AI Engineering and AISM Practices.

This is exactly WHY, WHAT, and HOW we operate as FDCs – We work inside the client's operating context, alongside technical and practice teams, to continuously translate market intelligence, engineering priorities, and AI practice requirements into executable actions.

EMBEDDED CONSULTING

- AI Engineering roadmap
- AI architecture/platform strategy
- Use-case and agent prioritization
- AI Innovation & use-case pipeline
- AI engineering capability assessment

PRACTICE & OPERATING MODEL

- AISM design
- AI CoE and operating model
- Practice maturity assessment
- Workforce and skill architecture
- AI Chart of Accounts & Pricing

MARKET & GROWTH

- Market Activation & Commercial strategy
- Research ecosystem/partner positioning
- Discovery of differentiators
- Differentiated Analyst positioning
- Value realization & Outcome Mgmt.
